

Software Engineer & Full Stack Developer with professional experience building and scaling end-to-end web applications. Proficient in the JavaScript/TypeScript ecosystem (Next.js, Node.js) and Python, with a proactive approach to complex system design and cloud-native solutions. Focused on bridging the gap between robust backend architectures and seamless user experiences.

PROFESSIONAL EXPERIENCES

Truckers Talent INC

Full Stack Developer Intern

January 2026 – Present

- **Payment & Database Engineering:** Architected a secure Stripe subscription system and optimized PostgreSQL relational schemas to handle complex user interactions and recurring billing consistency.
- **Automated Systems & Search Optimization:** Developed a Nodemailer-based email engine and implemented advanced geolocation search filters with Next.js for real-time alerts and user notification modules.
- **Cloud Infrastructure Management:** Orchestrated cloud storage and hosting solutions using AWS (S3) and DigitalOcean, optimizing media asset delivery and maximizing application uptime.

KEY PROJECTS

Thyroidea | Full-stack Medical SaaS (Azure AI, Node.js, React, Supabase)

- **OCR Pipeline:** Integrated Azure Document Intelligence to extract 9 thyroid markers from lab PDFs, with pmol/L unit normalization and rate-limited daily quotas per user.
- **Security:** Built custom Express middleware for JWT auth, RBAC, resource ownership validation and startup route introspection, with HIPAA-aligned audit logging and pg_cron-based log retention.
- **Billing & Notifications:** Implemented full subscription lifecycle via Lemon Squeezy (HMAC-SHA256 webhook verification, cancellation/recovery flows) and a server-side push scheduler with deduplication for medication and appointment reminders.

Go Concurrency Booking | Backend SaaS (Go, Redis, PostgreSQL, Docker)

- **Concurrency & Integrity:** Implemented Redis distributed locks, PostgreSQL optimistic locking, and partial indexes, eliminating race conditions and overselling under concurrent load.
- **Infrastructure:** Built JWT auth, atomic Lua rate limiter in Redis, and a cleanup worker with panic recovery; integrated Kubernetes health probes and graceful shutdown.

TECHNICAL SKILLS AND TECHNOLOGIES

- **Web Ecosystem:** JavaScript (ES6+), TypeScript, React, Next.js, Vite, Node.js, Express.js, Tailwind CSS, i18next.
- **Backend & Systems:** Python, Go (Golang), Java, PHP, Django, Bash, PowerShell.
- **Databases & Data:** PostgreSQL, MySQL, MongoDB, Supabase (RLS + pg_cron).
- **Cloud & DevOps:** AWS (S3/CLI), DigitalOcean, Docker, Kubernetes, Git, Linux, Postman.
- **AI & Specialized:** Azure AI (Document Intelligence), NLP, Machine Learning, Stripe/Lemon Squeezy APIs.

EDUCATION & CERTIFICATIONS

Universidad Nacional del Sur | Information Systems Engineer | Bahía Blanca, AR | 2024 – Present
Meta: Advanced React.js | Programming with Python | Full-Stack Developer | Version Control. | IBM: Artificial Intelligence Technologies Course.
